- Source documentation/communications

^{*} Patient Transfer to the hospital when necessary

Services provided by Alpan Farma CTSS

Mobile Nursing- Process Pathway

- 1. Completed & signed Service Request Form will be sent to Alpan Farma CTSS by Investigator Site (min. 1-2 weeks lead time).
- 2. Alpan Farma CTSS Project Manager will confirm receipt of the request
- 3. Alpan Farma CTSS will select and arrange for the study support team* for the execution of requested services (service can be defined as upfront for each site). Prior to the provision of requested service study support team member* will provide the followings to investigator site: CV, credentials, training documentation and signed site delegation form
- 4. Home nurse will contact patient and schedule time and date for visit in accordance with the Service Request Form. Service Provider obtains the biologic samples, conducts assessments and/or administers study drug, as ordered by the PI in the Service Request Form, and completes Source Documentation.

^{*} Home nurse

Mobile Nursing- Process Pathway (cont.)

- 5. Home nurse processes, packages and arranges for courier delivery of samples to the Central/Local Lab.
- 6. Central/Local lab receives and analyzes samples and provides results directly to the investigator site (via their web-platform)
- 7. Home nurse sends copy of visit Source Document to the responsible Alpan Farma CTSS PM team for further Quality assessment
- 8. Alpan Farma CTSS forwards a copy of approved visit Source Documents to the Investigator site promptly after each visit (usually within 48 hours of visit).

Mobile Nursing- Process Pathway (cont.)

- Alpan Farma CTSS subsequently sends original visit Source Documents to the Investigator
 Site via regular mail/courier
- 10. Alpan Farma CTSS PM provide status updates and invoices to Sponsor/Delegate at agreed timelines for services rendered. *Our services are complimentary to the sites and patients*
- 11. Sponsor/Delegate will need to provide any relevant study status updates to Alpan Farma CTSS team if/when required in timely manner
- 12. Each Service Provider (i.e. Nurse/Clinician) will complete the Site Delegation log following their study training by Alpan Farma CTSS Project Manager

Mobile Nursing- Process Pathway (cont.)

- 13. The PI will delegate specific responsibilities to each Service Provider in advance to the provision of their services
- 14. The original Site Delegation log signed by the Home Nurse will be provided to the site for completion by the PI.

Mobile Nursing- Process Pathway (services provided by SP)

1

• Service Provider arrives at the patient's home at the scheduled visit time with the appropriate visit supplies (e.g., portable centrifuge, lab kits, visit documents, etc.)

2

• Visit activities are conducted – e.g., PK sample collection, processing and packaging.

Site is responsible for patients follow-up and reporting AEs/SAEs

3

 Service Provider assesses changes in signs & symptoms and concomitant medications and contacts site immediately to report changes. Changes and communications with the site are documented on the Ambulant Care Source Documents.

 Central/Local Laboratory courier picks up blood samples (if applicable to the visit).
 Service Providers will fax/email the completed source documents to Alpan Farma CTSS PM within 24 – 48 hours for review.

L

• Alpan Farma CTSS Project Manager forwards complete and accurate copies of the source documents the sites electronically, typically within 48 hours (pending corrections), and the Service Providers are instructed to post the original versions to the site on a monthly basis
